

CHAPARRAL STEEL

[Now known as GERDAU AMIERISTEEL]

RECYCLING PLANT | PETERSBURG, VIRGINIA

CLIENT

Austin Commercial

PROJECT DESCRIPTION

TXI Chaparral Steel proposed to construct a 425,000-square-foot facility on its property in Petersburg, Virginia. Through extensive, detailed surveys of the land and meticulous engineering, the Townes Team prepared the site for construction. The project was built in record-breaking time. The facility is the most automated steel mill in the world and uses 100 percent recycled materials.
