

# COLONIAL HONDA/ GATEWAY HYUNDAI

COMMERCIAL CAR DEALERSHIPS | CHESTER, VIRGINIA

## CLIENT

Carter Myers  
Automotive Properties

## PROJECT DESCRIPTION

Carter Myers Automotive is an automotive industry leader with eight dealerships in central Virginia. The Townes Team was hired to ensure the highest level of site engineering for these two high-profile dealerships located off of the Walthall/I-95 interchange in Chesterfield County, Virginia. The dealership location contained sensitive wetland areas that required delineation and permitting by various agencies. The Townes Team expertly completed this work as well as the monitoring of the wetland impacts during construction. The Townes Team also preformed engineering layout to maximize the parking lot for dealership inventory and performed all boundary/construction survey and construction inspections on these dealership projects.
